

Pricing Calendar Templates

Pricing is your profit lever, it works from anywhere, and it is never set-it-and-forget-it. The six rules live in your pricing tool (we use PriceLabs); these templates are the calendar discipline that keeps them tuned. Emergencies are the loud failure. Rates drifting while nobody's watching are the quiet one.

Pair this with the Pricing SOP in this pack. One line from it applies to everything below: the weekly review is the one job you never delegate.

Template 1 — Property Settings Sheet

Fill in once per property, then keep it current. The six rules, as settings:

Rule	Your setting	Last checked
1. Weekend minimum: 3 nights	_____	____/____
2. Weekday minimum: 2 nights	_____	____/____
3. Last-minute minimum: 1 night (vacant dates coming up fast)	_____	____/____
4. Orphan nights: discount to fill 1-2 night gaps	_____	____/____
5. Last-minute discount: automate 5-10% off, 3-10 days out	_____ %	____/____
6. Holiday and event spikes: boost 20-50%, stretch minimums to match	see Template 3	____/____

Setting	Your number
Base rate, midweek	\$ _____
Base rate, weekend	\$ _____
Orphan-night rate	_____
	Amenity premium (validate with Rabbu before you buy the amenity) + _____ / night
Extra-guest fee: base count / per-guest per-night fee (set it against your market's top listings)	_____ guests / \$ _____

Template 2 — The Weekly 15-Minute Calendar Review

Once a week, every other week at minimum. Open the PriceLabs Market Dashboard and run the five checks. Log one row per review so drift has nowhere to hide.

The five checks:

- Minutes 1-5, scan the market.** What are comparable listings actually getting per night? Where is the season heading? How does occupancy look? How far out are guests booking?
- Minutes 5-8, check the six rules.** If the market has moved and a rule hasn't, adjust it.
- Minutes 8-11, look ahead.** Holidays or local events coming? Boost 20-50% and stretch minimums. Stranded 1-2 night gaps? Discount them to fill.
- Minutes 11-13, confirm calendars are synced.** Hospitable syncs Airbnb, Vrbo, and Booking.com in real time; Furnished Finder requires manually blocking dates, so keep a shared doc with your team. A double-booking is a 1-star review waiting to happen.
- Minutes 13-15, base-price check.** On cadence per Template 4.

Date	Comp rate/night	Occupancy	Booking window	Rules adjusted?	Gaps filled?	Events boosted?	Synced?	Base checked?
___/___	\$___	___%	___ days	☐	☐	☐	☐	☐
___/___	\$___	___%	___ days	☐	☐	☐	☐	☐
___/___	\$___	___%	___ days	☐	☐	☐	☐	☐
___/___	\$___	___%	___ days	☐	☐	☐	☐	☐

Template 3 — The Seasonal and Event Calendar

Rule 6, written down a year ahead. Fill in your market's dates, set the boost and minimum before the booking window opens, and check the box when the settings are live. The book's benchmark boosts: 20-50% for Thanksgiving, July 4, ski season, and local festivals, with minimums stretched to match.

Event	Dates	Boost %	Minimum stay	Settings live by	Done
Thanksgiving	_____	___%	___ nights	___/___	☐
Christmas / New Year	_____	___%	___ nights	___/___	☐
July 4	_____	___%	___ nights	___/___	☐
Ski season / peak season	_____	___%	___ nights	___/___	☐

Event	Dates	Boost %	Minimum stay	Settings live by	Done
Local festival: _____	_____	_____ %	_____ nights	___/___	☐
Local festival: _____	_____	_____ %	_____ nights	___/___	☐
School holidays / long weekends	_____	_____ %	_____ nights	___/___	☐

Holidays are also when minimums stretch: 3–4 nights on holidays against 2 nights off-peak on the reference cabin in the Pricing SOP.

Template 4 — The Cadence Calendar

How often each job happens, by phase:

Job	Launch phase (first months)	Stabilized (reviews grown)
Calendar review (Template 2)	Weekly, and watch trends closely	Weekly; every other week at minimum
Base price and rules update	Every 2–4 weeks until things stabilize	Revisit every 30–60 days
Pricing Ladder step-ups	Weeks 1–2: full 20% below market. Weeks 3–4: 10% below. Month 2: market rate. Months 3–6: 5–10% above once your rating is 4.8+	Ladder complete; optimize for profit
Seasonal calendar (Template 3)	Build it at launch	Refresh once a year, review each quarter
Furnished Finder manual blocks	Every booking, same day, in the shared doc	Same. No exceptions.

Who does what: PriceLabs handles most of it, and a VA can glance at the dashboard weekly and confirm the recommendations make sense. You step in manually for holidays and events. The review itself stays yours. Delegation is not abdication.
